Professional Summary:

6th-semester Computer Science undergraduate with hands-on experience in full-stack web development, AI/ML, and software engineering. Built real-world projects spanning deepfake detection, coding competition platforms, and game AI. Completed a frontend internship and actively upskilling in Python-based AI development. Eager to contribute to a team working on meaningful, production-level software.

EDUCATION

Bachelor's in Computer Science,
FAST NUCES University CGPA 2.73
07/2023 – 06/2027 | Lahore, Punjab

F.S.C Pre-Engineering, Queen Mary College A+
03/2021 – 07/2023 | Lahore, Punjab

Front End Developer Intern, Web SOPs
05/2023 – 08/2023 | Lahore, Pakistan

- Assisted in developing the frontend of a web application using HTML, CSS, and JavaScript, contributing to UI implementation and functionality.
- Worked with SQL database to manage and maintain user-generated data across multiple systems and platforms.

TECHNICAL SKILLS

Languages — C++ | C | HTML/CSS | JavaScript
| SQL | Python | ReactJS

Frameworks — Linux | HTML | CSS |
JavaScript | C++

Tools — VS Code | VirtualBox | VMware |
MSSQL Server

RELEVANT COURSEWORK

- Data Structures
- Software Methodology
- Database Management
- Object Oriented Programming
- Internet Technology
- Systems Programming
- Operating System

PROJECTS

Devsinc Coding Competition Website,
Python, React, Firebase
11/2025 – 11/2025

- Built a full-stack coding contest platform with authentication, submissions, and leaderboards.

Hospital Management System, HTML, CSS, JS, SQL

- Designed a hospital website with patient registration, scheduling, and billing features.

Maze Runner, Assembly Language

- Built a 3D maze game featuring maze generation, player movement, and AI enemies.

Bejeweled Blitz, C++, SFML
04/2023 – 04/2023

- Developed a tile-matching game with scoring, timers, and UI features.

Chess Game, OOP, C++
04/2023 – 04/2023

- Created a chess game with GUI, chess rules, undo/redo moves, and an AI opponent.

CyberX, AI, ML, Python, React

- Built a website to detect deepfake images, videos, and audio to reduce cybercrimes using AI, ML, and deep learning concepts.

INTERESTS

- Web Development (Frontend & Backend)
- Game Development & Design

LEADERSHIP & EXTRACURRICULAR

Volunteer - Management
04/2024 – Present | Lahore, Pakistan

- Participated in management of the Web Development competition department at Softec.
